October Homeschool

Day

- Best Sea Turtle Nest!
 - Ambassador Park Activity
- Meet Marineland's Ambassador Snakes
 - Ambassador Park
 - Meet a snake from 11:30am-12pm
 - Meet a snake from from 12:30pm-1pm
- Sea Turtle Anatomy and Biofacts!
 - Whitney Park Activity
- Animal Observation
 - Any Animal habitat

Our Animal ambassadors are going to help you learn all about sea turtles and snakes! Both kinds of animals play important roles in their environment, so come learn about some different ways that we can help them!

Best Sea Turtle Nest!

The life of a sea turtle is a complicated, challenging journey! From the incubation and hatchling stages, all the way to the mature adult stage, a sea turtle's life cycle is full of twists and turns.

Place the sea turtle life cycle stages in the correct order!					
 1 A female sea turtle egg hatches The sea turtle makes her way to the shore to lay her eggs in the sand The sea turtle makes her way from the beach to the ocean The sea turtle migrates to her breeding grounds The sea turtle finds a nice seagrass bed to hide and grow up in 					
Begin the best sea turtle nest activity at the education station in Ambassador Park What nesting items did you use to create your sea turtles nest?					
Did your egg survive?	Trial 1	Trial 2	Trial 3		
Yes					
No					
Name three threats to sea turtles.					
Name three ways humans can help sea turtles.					

Meet Marineland's Ambassador Snakes!

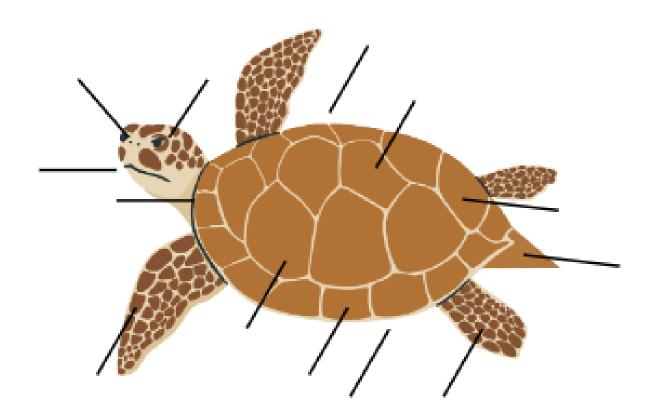

Hello everyone! My name is Dr. Love and I am a Corn Snake! I slither super fast and I love burrowing underground! Come visit me in Ambassador park from 11:30am-12pm!

Hello everyone! My name is Nagini and I am a Ball Python! I love warm snuggles in the sun and getting to go on swim adventures! Come visit me in Ambassador park from 12:30pm-1pm!

Sea Turtle Anatomy!

There are 7 different sea turtle species around the world! The biggest is the Leatherback at 6 ft 1000 lbs and the smallest is the Kemp's Ridley at 2 ft 100 lbs! Sea turtles play a vital role in maintaining the health of the world's oceans. Some major threats sea turtles are facing include entanglement, boat strikes, and pollution ingestion.

Using the diagram below, fill in the anatomy parts of our sea turtle!

Which part of the body allows us to determine if a sea turtle is male or female?

What two parts help protect the sea turtle?

Sea Turtle Biofacts!

Biofact	Which species does it belong to?	Fun Fact

Biofact	Which species does it belong to?	Fun Fact

Which biofact did you find the most interesting and why?

Animal Observations

Choose one animal at Marineland on which to do a physical and behavioral observation. You may pick any animal you'd like, but you must stick with that individual, so be sure you've identified a distinguishing characteristic about it that will help you keep it in view, even if it lives with a group of other animals that look just like it.

<u>Animal:</u>	
	Draw your animal here:

List 5 physical characteristics/adaptations (body shape, coloration, number of limbs, etc):

What do these adaptations help the animal do? (Avoid predators, catch prey, camouflage, etc)

Observe your animal's behavior for three minutes. Fill out the following behavioral observation chart. Put a tally mark next to the behavior every time you see it. If you see any behaviors other than the ones listed, please add them in the blank space provided:

Animal:					
Behaviors Seen	Minute 1	Minute 2	Minute 3	Total Tallies	
Eating					
Chasing					
Hiding					
Playing					
Breathing					
Sleeping					

What behavior did you see your animal do the most?

What kind of conclusions can you make from your observations? (Keep in mind that your three-minute observation does not represent a full day of the animal's life.)
