

Marineland's Education Station Field Trip Option

EDUCATION STATION OPTION: For \$17/person Marineland offers the Education Station field trip opportunity which can include access to all of our animal areas and [public presentations](#) as well as a private Sea to Shore Aquarium Tour and **two** 15-minute interactive educational lessons. Please see the list of lessons below to choose from. This option is available for group sizes ranging from 15 to 60 people.

Lesson Title	Description
Shark Anatomy	Students will discover the anatomical traits that make sharks so special. This program will encourage students to analyze adaptations and develop an improved understanding of the relationship between an organism's anatomy and behavior.
Dolphin Anatomy	Explore the extraordinary world of ocean megafauna. In this immersive, hands-on program, students will uncover the unique traits that help marine mammals survive and thrive beneath the waves. By the end of the program, students will gain a deeper appreciation of how an animal's biology and physiology are intricately tied to its role in the ocean environment.
Coral Reef Conservation	The environment is a complex system of interacting organisms and the biological systems that fuel them. Students will explore the interconnectedness of ecosystems through dynamic activities involving coral reefs and their importance to our oceans and the animals that inhabit them!
Sea Turtle Survivors	The superheroes of the Earth are sitting right within the classroom walls! To better understand the interdependence between humans and the environment, students will have the opportunity to reflect upon their own ecological footprint. This exciting game involving sea turtle survivorship will help students identify the ways in which humans impact the global environment.
